

## AutoCAD / GIS Technician

Seeking an experienced AutoCAD / GIS Technician with civil design based experience for work in the Communications Infrastructure Design Field. Will be responsible for layout and detailed development of CAD / GIS plan drawings, details and exhibits for Communications Outside Plant (OSP) projects.

- ❖ Requires the ability to layout base maps detailing existing topographic features; utilities; Right of Way; Site Plans; Floor Plans; and proposed infrastructure related systems using Customer and Internal CAD / GIS Standards and Specifications
- ❖ Will assist with non-routine and some complex drafting assignments requiring application of standardized drawing techniques and perform basic quantity and geometry calculations.
- ❖ Will work independently with occasional support from supervisor and requires knowledge of procedures for the production of design developments and construction documents
- ❖ May conduct peer reviews, quality control and quality assurance (QA/QC) reviews
- ❖ Assignments may also occasionally entail field investigations and site visits

## Requirements

Successful candidates must have the following experience and credentials to qualify for this position with professional references for verification:

- ❖ Associates Degree or Technical School Degree
- ❖ 5+ years' experience in civil/ transportation design with CAD / GIS programs
- ❖ Knowledge of AutoCAD, GIS and Microsoft Office software required
- ❖ Successful candidate must have a good working knowledge of Civil based design and drafting experience using Civil Related AutoCAD Versions; Utility Maps; Construction Drawings; Survey Data; GPS/GIS Data and general utility construction technical knowledge
- ❖ Previous experience with an Engineering Consulting firm is preferred
- ❖ Excellent oral and written communication and documentation skills are essential
- ❖ Compensation will be based on practical hands-on experience including demonstration of competency and obtaining results

Please send a resume and cover letter in response to this advertisement to [newcareer@commstructureconsulting.com](mailto:newcareer@commstructureconsulting.com) and include a summary of relative project experience and at least three professional references to contact. Serious Inquiries Only Please – Experience and Capability is a Must!

We provide a full benefit package, and promote teamwork in a supportive, creative and fun environment. Salary is commensurate with experience.
